

The Project on the "Life Enlightenment Hospital"

The notion and plan of the "Life Enlightenment Hospital" is a totally new, innovative and unique large project on medical services. The core of the project is initially to establish a full service private hospital with 260 beds. Besides the provisions of general medical care, it will also provide **an innovative integrated holistic caring service** that has never been provided by hospitals and other institutions before. This unique kind of **"end-of-life care"** will comprise of the following:

Currently, the services provided are very incomplete and fragmented, such that it makes the dying persons and their relatives to have suffered, especially from the **flaws and faults** that are caused by the present death and dying services. The scientific knowledge on brain cognition in advanced modern sciences has unveiled the fact that "human cognition" does not necessarily occur only in the human brain. There are some cardiac arrest patients who have suffered from their health problems and

had gone through the "Near-Death Experiences" (NDEs), as well as those who have revived from their deaths, due to various causes, and had also gone through the "Near-Death Experiences". These people could provide lots of relevant information in providing a clue that deceased persons could still have their "cognitive ability" even after "clinical death". **These empirical experiments, which have been conducted by world-renowned authoritative scientists with their reports published in scientific journals, have found to be strong proofs with solid scientific evidence.**

1. **Death Education, and knowledge on course of the after-death world** – to eliminate the patients' feeling of loss towards death and fear;
2. **Palliative care before death** – including care service for the dying persons' relatives and caregivers;
3. **An all-round "end-of-life care" and after-death services** – caring services for the dead at the crucial moments of death and dying, as well as the "guiding services for both the few hours, and (for navigating through the critical period) within 49 days, after death".

In fact, modern people have a very limited understanding on death.

Scientists have found that about 10-15% of those cardiac arrest patients who had been confirmed as "clinically dead" (that is, the cessations of breaths, heart beats and brain functions) could be revived by "cardiopulmonary resuscitation" (CPR) from death. Their "experiences of clinical death" could provide solid scientific evidence in proving that the human "consciousness and awareness" continue to exist during the "state of death".

In fact, the findings of at least five scientific researches conducted independently in England, USA and Holland have shown that about 10% of those patients who have later survived, after suffering from acute cardiac arrest and were confirmed as in the "state of clinical death", were found that they still had their "continuation of consciousness" during that time period.

This "continuation of consciousness" of a person never cease even during the "state of clinical death".

This discovery has a strong and significant meaning to it, which has confirmed the fact that it does not mean that nothing will remain after death, but instead, the "continuation of consciousness" of a person still continues to keep on functioning. In fact, these relevant researches and their findings had now been published in such renowned medical journals as "Resuscitation" and "The Lancet", where availed relevant research reports.

Dr. Sam Parnia, as Chairman of the "Horizon Research Foundation", an independent organization focused on research of the "mental states of human beings during terminal moments", has announced the launching of a large-scale research project during the "Symposium on Human Consciousness" held by the United Nations in September of 2008. This is a large-scale research experiment on the topic of "whether

there is the continuation of consciousness and awareness at the moment of death"? This research project would last for three years, and has been carried out by 25 physicians from nine different hospitals in both England and USA. This research project has sampled on researching 1,500 patients

who had survived cardiac arrest, which is led by Dr. Sam Parnia, the Honorary Senior Clinical Researcher at the University of Southampton, UK, together with **Dr. Peter Fenwick**, an authoritative Neuro-psychiatrist.

The numerous research findings of the different experiments have confirmed that the "consciousness and cognitive ability" of human beings continue to exist even after death. Furthermore, it has also shown that the physical bodies still have not yet died completely after a few hours to a few days, and so special caring services for them are much needed. In fact, a related large-scale study of near-death experiences has already been launched. Therefore,

the palliative care services before death, the end-of-life care services, and the "guiding services after death" are clearly all extremely important for the dying persons. If the dying person has received the necessary **"Death Education"** while one is still alive, and has learned the necessary knowledge on the operations of the **"World After Death"**, they will definitely understand the importance of the "end-of-life care services". As a result, the society will have a huge demand for this kind of service. Unfortunately, there is still not a single institution that can provide such type of comprehensive services at the present moment. **Such a fault is, indeed, a great regret for all human beings, but, at the same time, it is actually a great business opportunity.** As such, in order to assist the dying persons to have real and civilized cares during their last journeys in life, the "Life Enlightenment Charity Foundation Limited" has proposed to establish this Special Project on the "Life Enlightenment Hospital".

"Life Enlightenment Charity Foundation" *

"Life Enlightenment Charity Foundation Limited" (herein known as the "Foundation") actively advocates the Special Project on the "Life Enlightenment Hospital", through playing the role of a **charity body**. Upon the completion of this Special Project, **the "Foundation" will re-invest all the amounts of profits gained from this operation for other charity projects**, so that this innovative

project of great potential can help to nurture numerous other charity projects and items, with its sustainable resources to be perpetually developing, without ever drying up. The "Foundation" anticipates that this Special Project of the "Life Enlightenment Hospital" would create great demands in Hong Kong, the Mainland, and even for the whole world,

due to **its innovativeness and uniqueness** (especially on the various integral components of the end-of-life care, education on death, as well as the continuity of the holistic integrated services). Hence, upon the completion of its structure and the launching of its operation in Hong

Kong, the "Life Enlightenment Hospital" will become a unique role model of its own, so that its mode of operations would then be further extended to the rest of China, and to the global market of the whole world in a "franchise manner".

It is estimated that the total investments for the first phase of development for the "Life Enlightenment Hospital" will require HK\$2.7 billion. As this Special Project will have new sources of income coming from its innovative services (such as the "end-of-life care"

services, etc.), therefore it is expected that the payback period for this project would be around seven years. Furthermore, the "Foundation" is exploring its feasibility on all sorts and styles of financing alternatives, which may take different formats of financial cooperation with **public and/or private organizations, and direct investments of individuals, as well as loans, subsidies, and/or donations.**

We strongly believe this Special Project on the "Life Enlightenment Hospital" can actually cater for the real needs of dying persons, and will really provide the real caring services for their last journeys in life while living in a civilized society, all of which will simultaneously create a whole new market. Therefore, this is, indeed, a project that is both of a charitable nature and of great commercial opportunities.

* "Life Enlightenment Charity Foundation Limited" is a **registered charity body in the Hong Kong Special Administration Region of China.** The general public can find evidence on the Hong Kong Special Administration Region Government website at URL: http://www.ird.gov.hk/chi/tax/ach_search.htm

No Restrictions on Any Religious Beliefs

Many people might have misunderstood that the all-rounded "end-of-life care services" during and after death – especially the "guiding services for both the few hours, and (for navigating through the critical

period) within 49 days, after death" – would let this Special Project on the "Life Enlightenment Hospital" to be restricted by and confined with the religious norms of "Tibetan Buddhism"? **The answer is totally negative, that is, there are absolutely no restrictions at all on any religious beliefs.** This is because the

"World After Death" is a kind of environment that exist in Nature, and its Law of Evolution is well beyond any religious norms. In this regard, the kind of spiritual guidance for all human beings, and even for all sentient beings, to select for the right paths, while protecting them from falling into dangerous pitfalls, when entering into the "World After Death" should be a kind of universal education and basic knowledge, and is thus not confined to any religions. As such, this Special Project on the "Life Enlightenment Hospital" is suitable for all human, and sentient, beings. Yet, on the other hand, this Special Project will not hinder anyone to conduct any kind of religious rituals and ceremonies. Indeed, it can be described as the best place of help and guidance, in terms of spiritual shelter and refuge, for all human, and sentient, beings. It is

also the best place of spiritual assistance in guiding one's spiritual "life" to be uplifted, and to become "enlightened" eventually and successfully. From the deepest of our hearts, we hereby sincerely wish and pray that such a **perfect kind of** "Life Enlightenment Hospital" would **soon be established !**
